RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 52 pages. Original publisher: Washington, D. C. (441 G St. , NW, Rm. LM, Washington 20548) : U. S. General Accounting Office, 1996. OCLC Number: (OCoLC)37431240 Subject: Vaccination -- United States. Excerpt: . . . B-272491 cooperation during the screening phase, or inaccurately responded to the questions about age-eligible children. Although a response rate in this range is not atypical of telephone surveys, nonresponse rates tend to run 18 Also, while higher for telephone interviewing than for personal visitation. overall response rates varied tremendously across states and urban areas, nonresponse to particular questions ranged as high as 26 percent. When combined, these factors sometimes reduce to below 50 percent the effective response rates for key questions (for example, how many times has your child received a polio vaccine), raising concerns about the accuracy of resulting estimates. Household Respondents Have The potential to use household surveys for the collection of childhood Difficulty Providing Accurate immunization data is limited by the accuracy with which household 19 Data respondents can supply information on childrens immunization status. CDC NIS Data available to before the initiation of the, including a report...

Reviews

This publication might be well worth a read, and much better than other. It really is simplified but excitement inside the 50 % of the book. You will not feel monotony at whenever you want of the time (that's what catalogues are for concerning when you check with me).

-- **Imogene Bergstrom**

A must buy book if you need to adding benefit. I could possibly comprehended every little thing using this created e publication. I found out this book from my dad and i encouraged this pdf to understand.
