

## The Primary Source: Tropical Forests and Our Future

By Norman Myers

W. W. Norton & Company. Paperback. Book Condition: New. Paperback. 448 pages. Dimensions: 8.2in. x 5.4in. x 0.8in. With extensive knowledge and avid enthusiasm. . . . Myers, a worldwide conservation consultant, presents a sobering, consciousness-raising account of the environmental crisis that will develop if the thoughtless exploitation of tropical forests is allowed to continue. . . . An important contribution. ALA Booklist Tropical forests form the most diverse and complex ecosystem on earth a virtual powerhouse of evolution containing 40 percent of all living species. They provide us with food, medicines, germplasm stocks to replenish our crops, and new types of energy sources. It is clear we cannot afford to lose our tropical forests. But we are losing them to the overexploitation of multinational corporations, to the severe economic needs of the Third World, and to the consumerist appetites of the developed nations. Where is this happening and why The answers to these critical questions are set forth eloquently by Norman Myers, one of the world's leading experts on the environment and the author of *The Long African Day*, *The Sinking Ark*, and *A Wealth of Species*. Dr. Myers delineates the scope of the problem and offers a blueprint for its solution. This...

### Reviews

*The ebook is easy to go through easier to recognize. We have studied and I am certain that I will plan to read through once again in the future. I am quickly getting a pleasure of studying a composed publication.*

-- Prof. Adah Mertz Sr.

*A top quality book along with the typeface employed was interesting to learn. It is one of the most amazing books we have studied. I discovered this pdf from my iPad and dad recommended this book to learn.*

-- Mr. Sterling Hane
